Month	Weekday Goals	Weekend Goals
March	<ul style="list-style-type: none"> -Have at least one day off a week and one very easy ride. -Work on pedal drills to increase efficiency while maintaining low to moderate heart rates. (single leg and or high cadence) -Include some cycling specific strength training at least once per week. (upper and lower body) -You can throw in some cross training to break up the monotony of the trainer if you're stuck indoors. Still low to moderate intensity. 	<ul style="list-style-type: none"> -Plan out your projected ride time for each day of Ride the Rockies by dividing each day's miles by your average speed.
